

ANIMAL BODY Lyrics:

I'm made of flesh with soft vulnerable veins
the padding on my feet made for miles of walking on rough terrain
the hair on my back rises up when I feel unsafe
Miraculous, this animal grace

Here I sit at the brain outside my brain
of liquid crystals silicone invisible waves
the pulsating world squished into it's frame
I furrow my brow
and stare on amazed

It's a house of mirrors in the palm of my hand.
Eyes up in space look down anywhere I point them
Outside my window the earth beckons
Hair rises on the back of neck

What is this world to my animal sense
it has no taste, no teeth, no scent
what really occurs when I press send
animal brain strained must escape again

Animal Body is awakening me and taking me over (x's 2)
(Howls, x's 2)

I'm like a kid playing with mercury
it rolls and undulates silvery seductively
quietly seeping, computer imprinting
stripping my nature right out from under me.

(Wild sound scape)

Is the prescience in a box, on my desk
Is this the stone age of global clairvoyance
Soon enough no more buttons, just tap the air ('bing')
And my message will get there, it will get there.

(Wild sound scape)

Animal Body is awakening me and taking me over (x's 2)
(Howls, x's 2)
